Premise1: If A = B, Premise2: and B = C Logical connection: Then (apply principle of equivalence) Conclusion: A = C. In order for an argument to be considered valid the logical form of the argument must work – must be valid. A valid argument is one in which, if the premises are true, then the conclusion must be true also.

It also contains posthumous material from former co-host Perry DeAngelis.

### The Skeptics' Guide to the Universe - Wikipedia

Skeptics challenge these studies, but with so much evidence piled up in favor of the effectiveness of acupuncture, one wonders why there are still many people who are skeptical of the practice. If the evidence from millions of personal testimonies and from thousands of scientific studies doesn't convince the skeptics, what will?
